Supporting document

The college collects input (in the form of feedback and suggestions) from various stakeholders through suggestion boxes located in strategic locations around campus as well as through a link (<https://www.cvs.edu.in/feedback.php>) provided on the college website. There is a separate link for students where they can provide their feedback (<https://www.cvs.edu.in/studentfeedback.php>).

The collected suggestions are handled as needed and forwarded to the appropriate departments. A feedback form was provided to the outgoing class of 2020-21 collecting information across following factors- course curriculum, classroom experiences and instructional practices, educational materials, and library tools, placement, college administration and infrastructural facilities, and future prospects.

When the feedback was analysed, it was discovered that students in the majority of courses were extremely content with the coverage of the syllabus in class, and faculty also offered comments on their performance in class to assist them in improving their performance in the future. Aside from that, several teachers encouraged their students to participate in extracurricular activities as well. Half of the students were completely satisfied with the library services available to them. However, many students were dissatisfied with the classroom facilities, particularly the lack of working projectors in several rooms. This was communicated to the appropriate authorities, and many teachers are now bringing their laptops to class and using them to supplement the learning outcomes. The college faculty also shares feedback, if any, regarding with the other faculties in the concerned subject meetings in the University. Specific actions after consultations with the concerned authority are listed as below:

| S.No. | STUDENTS' FEEDBACK | ACTION TAKEN/Comment |
|-------|--|--|
| 1 | Sanitary pad vending machine sometimes doesn't dispense pads . | Coin must be inserted to dispense the pads. Students try to dispense it without a coin. Additionally, we will check |
